

TOMAL Microsand feeding equipment

Tomal Microsand feeding equipment is designed for feeding Microsand to the Actiflo process. A big bag support is included, but an alternative with vacuum conveyor is possible.

High quality level. TOMAL is certified acc. to. SS-EN ISO 9001.

Design

- Multiscrew feeder for high accuracy
- Big bag support for reusable bags
- Powder hopper including level monitoring
- Optional lifting device consisting of yoke for fork truck, alternatively motor driven hoist.
- Optional hopper for possibility to include two feeding lines from a common big bag

Adjustable big bag support stand with multiscrew feeder.

Advantages

- Tomal is able to manufacture complete units for big-bag emptying and feeding.
- The equipment can be suitable for free flowing or arch forming materials.
- Flexible modular system that can be easily customised to suit individual customer requirements.
- The plants can be turnkey delivered and tested from our workshop.
